EVALUATING THE LIFE OF COLD ROLLS. [1962]

Trans. of Stahl und Eisen (West Germany) 1959 [v. 79, no. 20] p. 1412-14[illegible]

DESCRIPTORS: *Rolling mills, *Steel, Friction, Life expectancy.

In order to study the working behaviour of cold rolls by means of simple operational methods, special check cards were used for comparing and representing diagrammatically the diameter loss on grinding during the working life of the rolls. It could be seen from all the examples that this simple method (1) shows the moment at which a roll becomes uneconomic, i.e. at which it should be regarded, (2) permits a comparison between different types of [illegible] and (3) permits a comparison between the same rolls from different manufacturers.
